Caption: 🌸 Want to extend the life of your blooms? Here are some quick flower care tips to keep your arrangements fresh! 🌿 1. Trim stems! ✂️ Cut about an inch off each stem at a 45-degree angle for better water absorption. 2. Change the water every few days. 💧 Clean water is vital for longevity. Regularly replace the water to avoid bacteria buildup. 3. Avoid direct sunlight and heat. ☀️ These can cause wilting. Place flowers in a cool, shaded spot. 4. Use flower food. 🌿 It provides essential nutrients for thriving flowers. Follow these tips to enjoy your arrangements longer. Happy blooming! 🌸
